Your city's base fee is higher than other cities and they do not provide payment arrangements, which other cities do.

Base fee: what your utility charges each month before you even turn the lights on

Rate per kWh : how much your utility charges for each unit of electricity used. On average, households in Georgia use 1,121 kWh per month.

Your electricity utility serves **11,381 customers** and is controlled by your **City Council**. Talk to them about making changes to your utility.

An energy burden is the percentage of your income spent on your electricity. In your county, **48.7% of households have a high energy burden** (they spend 6% or more of their income on electricity).

An energy audit measures how much energy your house is wasting because of inefficiency. **Your city utility does NOT provide energy audits (other cities do).**

People with serious illnesses legally can't be disconnected if it will worsen their illness. They must notify their utility. See **Georgia Rule 515-3-2-.03** for details.

We spoke with a LaGrange customer who was charged for electricity for their newly purchased, unoccupied house before they moved in.
